Dec 17, 2017

Federal Communications Commission Office of Engineering and Technology 7435 Oakland Mills Road Columbia, MD 21046

## To Whom It May Concern:

This letter is to request Limited Modular Approval in accordance with FCC Rule Part 15.212(b) for the certification request under FCC ID: UIBLNGLA002. This product is modular and can be used in specified OEM parking meters and gateways.

## Declaration of conditions.

Y/N	15.212(a)(1) Condition
N	(i) The radio elements of the module have their own shielding. The physical crystal and tuning
	capacitors may be located external to the shielded radio elements
Υ	(ii) The module has buffered modulation/data inputs (if such inputs are provided) to ensure that the
	module will comply with part 15 requirements under conditions of excessive data rates or over-
	modulation.
Υ	(iii) The module has its own power supply regulation.
Υ	(iv) The module complies with the antenna and transmission system requirements of §§15.203,
	15.204(b) and 15.204(c). The antenna(s) are either permanently attached or employ a "unique"
	antenna coupler (at all connections between the module and the antenna, including the cable).
Y	(v) The module was tested in a stand-alone configuration, i.e., the module was not inside another
	device during testing for compliance with part 15 requirements. Unless the transmitter module will
	be battery powered, it complies with the AC line conducted requirements found in §15.207. AC or
	DC power lines and data input/output lines connected to the module do not contain ferrites, unless
	they will be marketed with the module (see §15.27(a)). The length of these lines was the length
	typical of actual use or, if that length is unknown, at least 10 centimeters was used to insure that
	there is no coupling between the case of the module and supporting equipment. Any accessories,
	peripherals, or support equipment connected to the module during testing were unmodified and
	commercially available (see §15.31(i)).
Υ	(vi) The module is equipped with either a permanently affixed label or is capable of electronically
	displaying its FCC identification number.
Υ	(vii) The module complies with any specific rules or operating requirements that ordinarily apply to
	a complete transmitter and the applicant has provided adequate instructions along with the module
	to explain any such requirements.
Y	(viii) The module complies with any applicable RF exposure requirements in its final configuration.
	The instructions provided with the module adequately explain any usage conditions or restrictions.

Explanation of limitations for items not compliant with the above conditions.

Section	Detailed Explanations (if needed)
	The module is used in limited end products (with enclosures) with limited antennas. There is no
	external access to replace the antenna or affect the module in any way. The end products are
	serviced only by authorized personnel.

List of additional restrictions or conditions of use for this module (optional).

Module is used only with limited number of devices, in controlled locations, and serviced by authorized personnel only

Methods used to address restrictions to ensure compliance for all finished products (optional).

All deployment locations are tracked, service required by authorized personnel only

I acknowledge on behalf of the applicant that compliance of this module in all final configurations is the responsibility of the applicant under the condition that the integrator follows all provided installation instructions.

Sincerely,

Balu Subramanya

Blising
